Introduction

This manual contains detailed instructions and notes on the operation and use of this machine. For your safety and benefit, read this manual carefully before using the machine. Keep this manual in a handy place for quick reference.

Important

Contents of this manual are subject to change without prior notice. In no event will the company be liable for direct, indirect, special, incidental, or consequential damages as a result of handling or operating the machine.

Notes:

Some illustrations in this manual might be slightly different from the machine.

Certain options might not be available in some countries. For details, please contact your local dealer.

Laser Safety:

This machine is considered a class 1 laser device, safe for office/EDP use. The machine contains a 5-milliwatt, 760-800 nanometer wavelength, GaAlAs laser diode. Direct (or indirect reflected) eye contact with the laser beam might cause serious eye damage. Safety precautions and interlock mechanisms have been designed to prevent any possible laser beam exposure to the operator.

The following label is attached on the back side of the machine.

Caution:

Use of controls or adjustments or performance of procedures other than those specified in this manual might result in hazardous radiation exposure.

Notes:

The model names of the machines do not appear in the following pages. Check the type of your machine before reading this manual. (For details, see p.ii “Machine Types”.)

- Type 1: MP 1600L/MP 1600L/Aficio MP 1600L/IS 2316L
- Type 2: MP 2000L/MP 2000L/Aficio MP 2000L/IS 2320L

Certain types might not be available in some countries. For details, please contact your local dealer.

Two kinds of size notation are employed in this manual. With this machine refer to the metric version.

For good copy quality, the supplier recommends that you use genuine toner from the supplier.

The supplier shall not be responsible for any damage or expense that might result from the use of parts other than genuine parts from the supplier with your office products.

Power Source

220 - 240V, 50/60Hz, 7A or more

Please be sure to connect the power cord to a power source as above. For details about power source, see “Power Connection” in the Copy Reference.

ENERGY STAR Program

<p>ENERGY STAR®</p> 	<p>As an ENERGY STAR Partner, we have determined that this machine model meets the ENERGY STAR Guidelines for energy efficiency.</p>
-------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------

The ENERGY STAR Guidelines intend to establish an international energy-saving system for developing and introducing energy-efficient office equipment to deal with environmental issues, such as global warming.

When a product meets the ENERGY STAR Guidelines for energy efficiency, the Partner shall place the ENERGY STAR logo onto the machine model.

This product was designed to reduce the environmental impact associated with office equipment by means of energy-saving features, such as Low-power mode.

- **Low Power mode**
This product automatically lowers its power consumption 1 minute after finishing the last copy or print job. Printing is still possible in Low Power mode, but to make copies, you have to press the operation switch first. For details about how to change the interval between last job and Low Power mode, see p.29 “Energy Saver Timer”.
 - **Sleep mode**
This product automatically lowers its power consumption even further 1 minute after finishing the last copy or print job. Printing is still possible in Sleep mode, but to make copies, you have to press the operation switch first. For details about how to change the interval between last job and Sleep mode, see p.28 “Auto Off Timer”.

2. Combined Function Operations

Changing Modes

 **Note**

- You cannot switch modes in any of the following situations:
 - During immediate transmission
 - When accessing User Tools
 - While scanning an original
- The copying screen is displayed as default when the power is turned on. You can change this default setting. See p.25 “Function Priority”.

 **System Reset**

The machine returns automatically to its initial condition when the job is finished, after a certain period of time has elapsed. This function is called “System Reset”.

 **Note**

- You can change the System Reset time. See p.29 “System Auto Reset Timer”.

Multi-Access

You can carry out another job using a different function while the current job is being performed. Performing multiple functions simultaneously like this is called “Multi-accessing”.

This allows you to handle jobs efficiently, regardless of how the machine is being used. For example:

- You can make copies while receiving printer data.
- While printing, you can make operations for copying.

Note

- See p.25 “Print Priority” for setting function priority. As default, [**Display mode**] is set to first priority.
- You can specify the output tray where documents are delivered. For details about how to specify the output tray for each function, see the following descriptions:
 - p.26 “Output: Copier (copier)”
 - p.26 “Output: Printer (printer)”

Function compatibility

The chart shows function compatibility when print priority is set to “Interleave”. See p.25 “Print Priority”.

		Mode after you select		Copy		Printer		Scanner

Security

Confidential information is always at risk of being copied without permission or subject to unauthorized access through the network. To protect documents from such intrusion, not only can passwords be set, but also the Extended Security function can be used to strengthen security.

For those who require increased document protection, we recommend the Extended Security function.

Primary Security Functions

❖ **Protecting Image Data Remaining in Memory**

Protects image data remaining in memory. When a copy or print job is completed, or a job is canceled, the data is secure.

❖ **Authenticating Administrator**

Protects essential functions for administrating document security using an access code. See p.30 "Key Operator Code".

Operating Environment and Notes

Security for this machine is assured on the premises that the machine is used under the following conditions:

Operating Environment

- The condition of the machine is normal. (For example, it is not damaged, modified, or lacking components.)
- When the machine is connected to a network, the machine is protected from illegitimate access including unauthorized packet sniffing.
- The machine is managed by an administrator with thorough knowledge of the machine and capable of providing the proper conditions under which users can use the machine safely.

For Administrator

- This machine does not protect against illegitimate actions on the network. To avoid any risks on the network, further security is required.
- Security of this machine cannot be assured if any hardware component is detached or replaced with an inappropriate component. If these things have the possibility of occurring, other security measures are necessary.
- Avoid using a single number or consecutive numbers for a key operator code such as “00000000” or “12345678”. Since the numbers like this are easy to guess, using them will not provide the appropriate level of security.
- Remote document management using SmartDeviceMonitor for Admin is not available when the Extended Security function is on.
- User code is a function to help manage the use of the machine. It is not to protect confidential documents from others.

For User

- Before scanning originals using the scanner function, make sure all other operations are complete.

*5 Set one sheet at a time for your needs. See *Copy Reference*.

 **Important**

- If you use damp or curled paper, a misfeed might occur. In such a case, try turning over the paper stack in the paper tray. If there is no improvement, change to copy paper with less curl.

 **Note**

- When using the bypass tray, we recommend you set the copy paper direction to .
- If you load paper of the same size and in the same direction in two or more trays, the machine automatically shifts to another tray when the tray in use runs out of paper. This function is called Auto Tray switching. This saves interrupting a copy run to replenish paper even when making a large number of copies. You can cancel this setting.

 **Reference**

To add paper, see *Copy Reference*.

To change the paper size, see p.42 “Changing the Paper Size”.

Unusable Paper

 **CAUTION:**

- Do not use aluminum foil, carbon paper, or similar conductive paper to avoid a fire or machine failure.

 **Important**

- Do not use any of the following kinds of paper or a fault might occur:
 - Art paper
 - Aluminum foil
 - Carbon paper
 - Conductive paper
- Do not use copy paper that has been already copied on. Otherwise, a paper misfeed might occur.

 **Note**

- Do not use any of the following kinds of paper or a misfeed might occur.
 - Bent, folded, or creased paper
 - Torn paper
 - Slippery paper
 - Perforated paper
 - Rough paper
 - Thin paper that has low stiffness
 - Paper with a dusty surface
- If you make copies on rough grain paper, the copy image might come out blurred.
- Do not use paper already copied or printed on.

Paper Storage

 **Note**

- When storing paper, the following precautions should always be followed:
 - Do not store paper where it will be exposed to direct sunlight.
 - Avoid storing paper in humid areas (humidity: 70% or less).
 - Store on a flat surface.
- Keep open reams of papers in the package, and store as you would unopened paper.
- Under conditions of high temperature and high humidity, or low temperature and low humidity conditions, store papers in a plastic bag.
